

Our very first medallions that can be cooked to help the transition to a natural raw foods diet!

This recipe is based purely on beef as the protein as well as the source of organ meat, with the addition of broccoli for a complete and balanced meal.

Beef contains all of the essential amino acids that dogs need. It's an excellent source of iron and zinc, two minerals essential for supporting cardiovascular health. Broccoli contains a number of anti-inflammatory compounds that will help reduce the risk of chronic disease.
